

RAVIRAJ KUMAR SINGH

+91 78568 49553 | ravirajkumarsingh40@gmail.com | [LinkedIn](#) | [LeetCode](#) | [GitHub](#)

EDUCATION

Bachelor of Technology in Computer Science & Engineering *Expected: May 2027* | CGPA: 7.36 (Till 5th Semester) Supaul College of Engineering, Bihar | Affiliated to Bihar Engineering University, Patna

TECHNICAL SKILLS

Languages: C, C++, Java

Full Stack Developer: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, REST API

Tools & Platforms: Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, OOPS, DBMS, OS, CN, System design

EXPERIENCE

Web Development Intern | InternPe Remote | 4 Weeks • Developed 4+ frontend web applications including functional web games and productivity tools, gaining hands-on project experience

- Strengthened skills in responsive design, JavaScript logic, and project structuring through iterative real-world builds
- Documented and showcased project demos on LinkedIn, demonstrating strong communication and professional visibility

PROJECTS

FinTrack *React.js | Node.js | Express.js | MongoDB* • Built a full-stack personal finance app for managing income, expenses, transactions and budgets. • Implemented JWT authentication, bcrypt password hashing, protected REST APIs, CRUD, search, filter, sort and user specific data isolation.

- Deployed using Vercel and MongoDB Atlas.

FinTrack GitHub: <https://github.com/raviraj785/FinTrack>

Live Demo: <https://fin-track-enayve50v-raviraj785.vercel.app/>

Hospital Management System *Java | OOP | ArrayList* • Developed a console-based hospital management system for managing patients, doctors, and appointments. • Implemented automatic ID generation, patient/doctor management, and appointment scheduling using Java and ArrayList.

- Applied Object-Oriented Programming concepts including classes, constructors, encapsulation, static members, and method overriding.

GitHub: <https://github.com/raviraj785/Hospital-Management-System-Java>

E-Commerce Website (Frontend) *HTML | CSS | JavaScript* • Designed and built multi-page product listing UI with structured layout, visual hierarchy, and reusable UI components • Focused on UX best practices including consistent spacing, readable typography, and accessible navigation

Connect Four Game with AI *JavaScript | Algorithms* • Engineered an interactive browser-based Connect Four game with an AI opponent using basic game-tree logic • Applied algorithmic thinking and problem-solving to implement win-detection and turn-management systems

ACHIEVEMENTS & ACTIVITIES

- 75+ problems solved on LeetCode covering Arrays, Recursion, Sorting, Searching, and Linked Lists
- Exploring entrepreneurship and startup ideation, with a focus on technology-driven solutions
- Engaged in tech content creation, sharing project builds and learning milestones on LinkedIn to grow professional visibility
