PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in Java, Data Structures & Algorithms, and Object-Oriented Programming, currently building toward a career in Java Full Stack Development. Hands-on experience developing and deploying complete web applications (React.js, Node.js, Express.js, MongoDB), backed by four self-built projects and internship exposure to frontend development and applied Python-based machine learning. Solved 85+ LeetCode problems and consistently strengthens core computer science fundamentals through independent practice.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

2023 – 2027

Supaul College of Engineering, Bihar (Bihar Engineering University, Patna)

- CGPA: 7.36 / 10 (till 5th Semester) | Expected Graduation: May 2027

EXPERIENCE

Web Development Intern — InternPe (Remote)

4 Weeks

- Developed 4+ frontend web applications, including functional web games and productivity tools, using responsive web design and JavaScript.
- Structured and iterated on multiple hands-on application builds, strengthening frontend project organization skills.
- Documented and showcased project demos professionally, gaining experience in project presentation.

AI/ML Intern — Edulogy (Remote)

- Worked on beginner-level machine learning projects using Python, applying data preprocessing, model training and basic model evaluation.
- Used Pandas, NumPy and Scikit-learn to prepare data and build simple prediction models.

PROJECTS

FinTrack | React.js, Node.js, Express.js, MongoDB

[GitHub](#) | [Live Demo](#)

- Built a full-stack personal finance platform for managing income, expenses, transactions and budgets.
- Implemented JWT authentication, bcrypt password hashing, and protected REST APIs with full CRUD operations and search/filter/sort, ensuring user-specific data isolation.
- Deployed the application using Vercel with MongoDB Atlas as the cloud database.

Hospital Management System | Java, OOP, ArrayList

[GitHub](#)

- Developed a Java-based console application for managing patients, doctors and appointments with automatic ID generation and scheduling.
- Applied core OOP principles — classes, constructors, encapsulation, static members and method overriding — with ArrayList-based data management.

E-Commerce Website | HTML, CSS, JavaScript

[GitHub](#) | [Live Demo](#)

- Designed and developed a multi-page e-commerce frontend with structured product layouts and reusable UI components.
- Focused on responsive UX, consistent spacing, readable typography and accessible navigation.

Connect Four with AI | JavaScript, Algorithms

[GitHub](#) | [Live Demo](#)

- Engineered an interactive browser-based Connect Four game with an AI opponent using basic game-tree logic.
- Implemented win detection and turn-management systems while applying algorithmic problem-solving.

TECHNICAL SKILLS

Languages: Java, C, C++

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, MongoDB Atlas

Tools: Git, GitHub, VS Code

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

ACHIEVEMENTS & CERTIFICATIONS

- Solved 85+ LeetCode problems across Java and C++, covering Arrays, Recursion, Sorting, Searching, Linked Lists, Backtracking and Dynamic Programming.
- Coding Profiles: [LeetCode](#) | [Java DSA Repository](#) | [LeetCode Journey Repository](#)
- 1st Runner-Up, Drone Assembly Challenge — DRONE-X Competition, IIT Patna (2024).
- Cisco Certifications: Advanced Programming in C, Programming Essentials in C, and Introduction to Cybersecurity.
- NPTEL Certifications: Internet of Things (IoT) and Soft Skill Development.
